SUMMARY

Computer Science Engineering graduate with foundations in C++, Java, Data Structures and Algorithms, OOP, Operating Systems, and Computer Networks. Hands-on experience in software development, application debugging, REST APIs, databases, testing, Git, Linux, and cloud technologies. Familiar with C++ fundamentals, STL, pointers, and references. Seeking an entry-level Software Engineer role to apply problem-solving and software development skills.

SKILLS

Languages: C++, Java, C, JavaScript

Core: Data Structures & Algorithms, OOP, STL, Operating Systems, Computer Networks, DBMS

Development: Spring Boot, REST APIs, Node.js, Express.js, React.js, MySQL, MongoDB

Tools: Git, GitHub, Linux, Docker, CI/CD, AWS, Postman, Testing

EXPERIENCE

Bravynex Engineering LLP – Web Developer

Jul 2026 – Present

- Develop and maintain web application components using JavaScript, HTML, CSS, and modern web technologies.
- Contribute to application debugging, performance optimization, component integration, and troubleshooting.
- Collaborate with development and design teams to deliver reliable and maintainable software features.

KodNest – Full Stack Java Development Intern

Jan 2026 – May 2026

- Developed Java-based application components and REST APIs using Object-Oriented Programming with MySQL and MongoDB.
- Applied data structures, OOP, debugging techniques, Git workflows, and software development practices.
- Participated in implementation, testing, debugging, and code review activities in an Agile-oriented environment.

Maiora IT Services – Load Testing Intern

Oct 2024

- Executed load and functional testing to evaluate application performance, scalability, and reliability.
- Designed test cases, analyzed results, documented defects, and collaborated with developers during testing activities.

Cognifyz Technologies – Web Development Intern

Aug 2024 – Sep 2024

- Developed responsive web application components using HTML, CSS, and JavaScript while debugging application issues.
- Integrated frontend components with backend services and contributed to application development and testing.

EDUCATION

KVG College of Engineering, Sullia

2022 – 2026

B.E. in Computer Science and Engineering

CGPA: 8.5

Nehru Memorial PU College

2020 – 2022

Pre-University (PCMB)

87.83%

PROJECTS

Enterprise Student Management System

Java, Spring Boot, MySQL, REST APIs, Docker

- Developed a role-based application using Java and Spring Boot with authentication, authorization, and access control.
- Designed REST APIs for student, teacher, course, attendance, and examination management using MVC and Service-Repository architecture.
- Implemented attendance tracking, grade calculation, performance reporting, API documentation, and Docker containerization.

ShopNow – Full Stack E-Commerce Application

React.js, Node.js, Express.js, MongoDB, JWT

- Developed a full-stack e-commerce application with product management, authentication, and role-based features.
- Implemented REST APIs and database operations using Node.js, Express.js, and MongoDB Atlas.
- Integrated JWT authentication and bcrypt password hashing and deployed frontend and backend services.

Online Electricity Complaint Management System

React.js, Node.js, Express.js, MongoDB

- Developed a web-based system for registering, tracking, and managing electricity complaints.
- Designed REST APIs and integrated MongoDB for complaint and user data management.

CERTIFICATIONS

AWS Educate: Introduction to Cloud 101, Amazon S3, Amazon VPC

NPTEL: Cloud Computing, Programming in Java

Udemy: Microsoft Excel – Beginner to Advanced
